

## **AMENDMENTS TO THE SPECIFICATION**

Please replace the paragraph beginning on page 5, line 28 with the following:

The holder 20 is disposed in the first concave portion 11 of the body 10 in a method such that it is moved between an idle position (as shown in Fig. 5a and hereinafter referred as a first position) and a compressed position (as shown in Fig. 5b and hereinafter referred as a second position). As shown in Fig. 3a and Fig. 3b, the holder 20 includes a protrusion 21, two elastic portions 22, an inclined surface 23, and a release hole 24. An obtuse angle  $\theta$  is formed between the inclined surface 23 and the first concave portion 11 (or the body 10).
